SUMMARY

With a solid foundation in full-stack development gained through internships at G-tech Group and AR Technologies, I specialize in using Python and React JS. My passion lies in creating intuitive, user-focused applications while continuously enhancing my skills and embracing new challenges. I thrive in collaborative environments and aim to deliver innovative solutions that drive user engagement and satisfaction

EXPERIENCE

Python Programming Intern

Ananthapur

📅 12/2023 📍 Remote

Internship focused on Python programming

- Developed Python applications programming language during this internship
- Facilitated knowledge sharing sessions on Python programming techniques, elevating team expertise and fostering a culture of continuous learning
- Participated in project planning meetings, contributing insights on development timelines and resource allocation

Web Development Intern

Bangalore

📅 06/2023 📍 Remote

Internship focused on web development using React JS

- Created the user interface based on the client's requirements using React JS
- Debugged and optimized UI issues in the application, resolving accessibility issues
- Implemented role-based login using backend, streamlining team workflows with clear API documentation
- Executed secure user authentication with JSON web tokens

EDUCATION

Bachelor of Science (Computers)

Sri Krishnadevaraya University

📅 08/2021 - 05/2024

SSC

JCNRMMBH SCHOOL

📅 06/2017 - 05/2018

Intermediate (MPC)

JCNRM Jr College

📅 06/2018 - 05/2020

STRENGTHS

Soft Skills

Quick Learner, Critical Thinking, Management Skills

KEY ACHIEVEMENTS

Professional Projects and Achievements

Developed responsive UIs with React JS, TailwindCSS, and Bootstrap, improving user engagement by 25%. Implemented role-based authentication for 500+ users using Node.js and JWT, ensuring robust security. Debugged critical UI issues, reducing load times by 30%. Built a Jobby application and an E-commerce Shopping app showcasing end-to-end development skills

SKILLS

Bootstrap

CSS

GitHub

HTML

JavaScript

Python

React

Tailwind

Node.js

MERN

SQLite

Typescript

PROJECTS

Jobby Application & E-commerce Shopping App

📅 Present

Projects showcasing full-stack development skills

- Developed a job-search platform named Jobby Application
- Built a user-friendly E-commerce shopping application
