WORK EXPERIENCE

AR Technology

Web Development Intern   Oct-2022 - Dec-2022

- I have completed this internship remotely at my college. Developed a new feature in a web development project that increased user engagement by enhancing interactivity. Collaborated with a team using Agile methods to improve project efficiency and delivery. Utilised HTML, CSS, JavaScript, React.js, and Bootstrap to build responsive websites.

G-Tech Group of Technologies Education

Python Intern   Mar-2023 - Jul-2023

- I have completed this internship remotely at my college. Strengthened Python fundamentals through small projects, focusing on code efficiency and collaboration. Enhanced communication, time management, and problem-solving skills in a team environment. Applied software development principles to prepare for professional technology roles.

Elevate Labs

Web Development Internship   Sep-2025 - Nov-2025

• Completed a hands-on web development internship focused on real-world project execution and UI development.
• Worked on building responsive, user-friendly web interfaces using React.js, JavaScript, HTML/CSS, and modern UI practices.
• Recognized as Best Performer for exceptional dedication, quality of work, and ability to deliver tasks on time.

EDUCATION

Jcnrm Degree college(SKU)

BSC (MECs) - 7.28   2020 - 2024

PROJECTS

Jobby App (Achyuta Future of Hiring) ↗

- Built a full-stack job portal with secure sign-up/login and CRUD operations for job postings, editing, and deletion. Implemented review system, search, filters, pagination, and dashboard for job posters with form validation. Designed responsive features, including navigation bar, user profile, and integrated real time notifications. Gained experience in scalable web application development with continuous improvements.

Shopping App (ROCs-Market)

- Developed e-commerce app with secure authentication, product browsing, search, filters, and image details. Integrated cart management (add/update/remove), checkout, order summary, and Stripe payments with validation. Built responsive navbar, user profile, order history, and admin dashboard; added services section for home services. Implemented wishlist and favourites; focused on real-world enhancements.

Portfolio ↗

- This is my Portfolio. And I deployed this web page with Vercel and completed 5+ mini projects practising CRUD operations, API integration, responsive design, and form validation. Iteratively added features to explore real-world use cases and improve web development skills.

SKILLS

- Frontend : HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, TypeScript, React.js
- Backend : Node.js, Express.js, MongoDB, SQL, Python
- Full-Stack : MERN Stack, CRUD Operations, API Integration, Form Validation, Responsive Design
- Exploring : Next.js, AWS, DevOps, FastApi
